**SW/GW/WHPP:**

Non-Responsive / Deliberative

## CWA PROGRAM INTEGRATION

Non-Responsive / Deliberative

Non-Responsive / Deliberative

## PRIORITY WATERSHEDS

Non-Responsive / Deliberative

## HANALEI WATERSHED

Non-Responsive / Deliberative

## WAIMANALO WATERSHED

Non-Responsive / Deliberative

## W. MAUI WATERSHED

29. A monitoring design for the Kahana watershed was agreed to. Watson is the lead contact for the W. Maui watershed and will prepare a one page description of the Kahana

watershed monitoring plan to share with other programs and partners. Hudson will provide shape files to EPA (Tony Olsend) by mid-January 2009.

30. Lahaina WWRF - After a presentation by USGS on the results of the tracer studies in Kehei and Lahaina, there are increasing concerns about the impacts of the Lahaina WWRF injection wells on the near-shore coastal environment. One outstanding question is the travel time for the injected waste water plume to reach the shallow coastal zone. DOH and EPA will continue to discuss options for evaluating and controlling impacts of waste water from this source.
31. EPA will continue to coordinate with DOH SDWB and CWB on the injection wells at Lahaina WWRF as we evaluate public comments and consider potential conditions for the facility's UIC permit.
